Server Care:

Boost uptime and productivity.

Empower business continuity and performance with
Fruth Group monitoring, supporting, and maintaining servers.

Rest assured and enjoy peace of mind while your servers are proactively managed, maintained, and monitored 24/7/365 with Fruth's Server Care. Avoid destructive server downtime to support user productivity and business resilience. Meanwhile, simplify server network setup and maintenance while providing secure file and application access with appropriate network permissions on a dedicated server.

Capabilities

Server Monitoring

Server Support

Server Maintenance

Rest assured with proactive server care and maintenance to alleviate downtime and make productivity gains.

Benefits

Count on flat rate, fully managed, 24/7/365 server care support, so you can:

- **Keep your organization operating and online** with 24/7/365 monitoring of your services and immediate response to issues and downtime alerts.

- **Rely on a responsive single point of contact** and access to dedicated in-house server technicians for any issues or questions with offsite troubleshooting, remote problem resolution, and in special cases, onsite support.

- **Empower greater efficiency and security** with Fruth's managed services team covering server maintenance, including patch management, anti-virus/malware software management, and more.

- **Simplify server network setup and maintenance—**unleashing a secure app and file environment for users to store and access files with network permissions on your dedicated server.

Do more with a support-backed dedicated server.
