

Workstation Support:

Protect and empower your workforce.

Ignite employee satisfaction and workplace security with Fruth Group Workstation Support.

Fuel a positive employee experience while securing your work environment. Fruth Group's Workstation Support Services protect your organization with an advanced security layer, patching, and vulnerability discovery solutions. Reduce response time and gain agility with Fruth's in-house help desk team leveraging our state-of-the-art-ticketing system and covering complete endpoint management and support. Solve problems sooner with agile remote workstation support and responsive onsite services for advanced issues.

Rely on Fruth Group's workstation technicians to manage and protect your environment and resolve issues sooner to keep your teams focused on your business and customers.

Benefits

Keep your IT team focused on strategic business initiatives while Fruth's workstation support technicians cover labor-intensive operations and support management, so you can:

- **Rely on user support and workstation service**—Fruth's support portal and advanced ticketing system trigger swift problem solving via in-house remote and on-site tech support as necessary.
- **Level up your visibility and user experience** with 24/7 network health and device performance and network health monitoring and track your IT investment including asset and inventory overviews and executive reporting for key business members.
- **Protect your data and IT investment**—our technicians perform preventative maintenance and mitigate workstation vulnerabilities with Microsoft patch management. Rely on third-party patching as needed, and total anti-virus and malware software management.
- **Keep your environment current** with license management, regular firmware, hardware, software, plugin maintenance and upgrades, and license management.

Secure your business and fuel greater productivity.
